

Setting up your Frisbee gauge

1. unpack items:

Tripod
White tube inserts
Bottle with insert in cap
Spare bottles
Frisbee gauge
Spare foam inserts
Take tripod made of two parts
2 the tripod with a lower adjust knob

2, An insert metal tube with an upper adjust knob

Setting up

This is done by:

Undoing the lower knob, pull apart the legs, next hold the fixed section with lower knob on it and pull the central pole. The legs should splay out wider and then start to pull in. Insert the white tube (**From the bottom if the white plastic connector is already fixed in the top of the tube**, lock the stand in the position at a height just above the bottle and attach white plastic tube.

Adjust the splay of the stand to allow for the bottle height. See video on website

Attach the plastic adapter over the top of the white plastic tube at the same time loosen the top adjust knob and pull up the insert tube. The insert tube should sit into the bottom of the bird guard. Tighten both fastening bolts. One secures the head the other the adapter
